DETAILED ACTION

1. Prosecution on the merits is hereby reopened in view of the following new rejection.

Claim Objections

2. Claim 36 is objected to because of the following informalities: there is no antecedent basis for the terms "the free end" in line 7 or "the welt end" in line 9. It is also noted that there is no positive structural relationship set forth between the welt core and the welt flap. Appropriate correction is required.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 4. Claim 36 is rejected under 35 U.S.C. 102(b) as being anticipated by Yamamoto et al 5,279,782. The upper leg of the U-shaped welt shown in Figure 2 may be considered a flap with the part connecting the two legs of the U-shaped welt the core. The projections on said upper leg or flap may be considered fasteners, with one fastener at a free end of the flap and a second fastener in an area of the core that is substantially perpendicular to the flap or leg.
